C. TOXIC SUBSTANCE REDUCTION PLANNING

Objectives & Targets

Substance	Objectives & Targets	Reduction Option Progress
Nitric acid	While Parmalat Canada, Inc. has not identified any reduction options as technically and economically feasible, the facility will continue to monitor industry standards for the use of nitric acid in CIP systems.	No reduction options to be implemented.
Nitrate ion	While Parmalat Canada, Inc. has not identified any reduction options as technically and economically feasible, the facility will continue to monitor industry standards for the use of nitric acid in CIP systems which creates nitrate ion.	No reduction options to be implemented.
Sulphuric acid	Reduce the use of sulphuric acid through equipment modification and a change in operational practices.	pH target continues to be adjusted on an ongoing basis to be closer to the discharge limit. This was completed in 2013 prior to May 31, 2013. Planning and approval for project to replace pH balancing tank underway.

Annual Report Certification Statement

As of May 25th, 2016, I certify that I have read the report(s) on the toxic substance reduction plan(s) for Nitric acid, Nitrate ion and Sulphuric acid, and am familiar with its/their contents and to my knowledge the information contained in the report(s) is factually accurate and the report complies/reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under the Act.
