### C. TOXIC SUBSTANCE REDUCTION PLANNING

#### Objectives & Targets

Substance	Objectives & Targets	Reduction Option Progress
Nitric acid	While Parmalat Canada, Inc. has not identified any reduction options as technically and economically feasible, the facility will continue to monitor industry standards for the use of nitric acid in CIP systems.	No reduction options to be implemented.
Nitrate ion	While Parmalat Canada, Inc. has not identified any reduction options as technically and economically feasible, the facility will continue to monitor industry standards for the use of nitric acid in CIP systems which creates nitrate ion.	No reduction options to be implemented.
Sulphuric acid	Although no options for reducing the use of sulphuric acid were identified as technically and economically feasible, the facility intends to implement an option to reduce the risk of over usage due to equipment failure.	Parmalat continues to ensure that spare parts are available in the event of equipment failure, where feasible. Implementation is consistent with the steps described in the plan.

#### Annual Report Certification Statement

As of June 12<sup>th</sup>, 2017, I certify that I have read the report(s) on the toxic substance reduction plan(s) for Nitric acid, Nitrate ion and Sulphuric acid, and am familiar with its/their contents and to my knowledge the information contained in the report(s) is factually accurate and the report complies/reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under the Act.
